Dear Rising Sixth Graders and Parents,

We are working hard to get ready for your arrival in Middle School. Spanish in sixth grade is a graded, core academic class, rather than an enrichment class. It is part of a three-year program which will let you complete a high school Spanish 1 credit by the time you graduate from eighth grade.

We will review and relearn material covered in the St. Michael's Lower School or other elementary schools during the first quarter of sixth grade. If you are a new student starting Spanish for the first time, the first quarter will be a time of learning new material. However, all students will benefit from spending some time over the summer becoming familiar with or refreshing their memories of some core material. Reviewing once or twice a week over the summer will make the first quarter of Spanish a little easier for you. This homework is required and will count as your first 4 homework assignments in sixth grade.
